

**When you purchase our product, you receive more than just software. We establish long-term relationships with our customers and are dedicated to providing you with the best support possible.**

Each of our customers is assigned an INFICON software engineer to handle requests specific to their organization. This ensures they have a consistent contact who is well-acquainted with their systems.

#### ADVANTAGES AT A GLANCE

- Monthly user-group meeting allows users to suggest functionality and new metrics
- Users spend significantly less time preparing reports
- Heightened productivity: Easy to monitor and manage equipment and processes
- Allows users to focus on what is most important right now
- Improved performance: increased productivity and output
- Reliability: Our customers know they can count on a reliable software and a team that is responsive and committed to helping end users.

**The power of FabTime lies in the ability for everyone to access multitudes of fab data quickly and easily, and to build custom charts and data tables that can be saved for future use. The FabTime interface is robust, comprehensive, and intuitive in the look and feel to the end user.**

FabTime transforms the way you manage operations by providing you unparalleled visibility into manufacturing processes.

In today's fast-paced manufacturing environment, accurate and timely reporting is crucial for optimizing efficiency and driving informed decision-making.

Through leveraging FabTime's flexible reporting, fab personnel can effectively monitor fab performance, conduct root cause analysis, and proactively address problems.

### HOW IT WORKS

A continuous feed of transactions from your data source systems is extracted and loaded into the digital twin and then FabTime for storage in a database

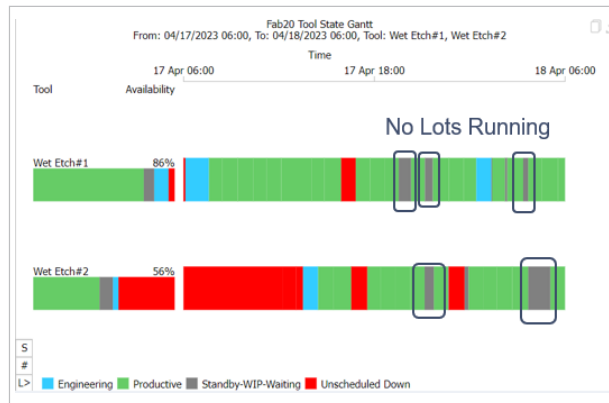

Predefined reports, created specifically for factory applications, refresh with real-time data.

Fab personnel use reports as-is or configure them to display specific data sets, all without requiring IT intervention.

# In today's fast-paced manufacturing environment, accurate and timely reporting is crucial

## Eliminate Wasted Capacity

5%  
REALIZED  
BOTTLENECK  
CAPACITY

RECEIVE ALERTS WHEN THERE IS  
STANDBY-WIP-WAITING

MES data often gets buried, making it difficult for engineers to locate the data they need

### FABTIME MAKES THINGS EASY

- ✓ One source of truth
- ✓ On-demand reports
- ✓ 175 Reports for Diverse Applications
- ✓ User-friendly and intuitive
- ✓ Simple, hassle-free installation
- ✓ Efficient root cause analysis
- ✓ Track KPIs over time
- ✓ Alerts for areas requiring attention
- ✓ Identify production issues quickly
- ✓ Improved cycle times
- ✓ Improved profit margins

### FEATURES

- Filtering and drill-down
- 24/7 system monitoring
- Personalized technical support
- Regular updates and improvements
- Customizable real-time alerting
- Web-based access across multiple devices
- Live software training for end-users
- Admission to monthly user group meeting
